EXPERIENCE

Full Stack Developer

September 2024 – Present

Nail Order

Glasgow, UK

- Own custom Shopify **Liquid** theme (Lorenza): N0- snippets for free-shipping progress, VAT toggle, metaobject sale campaigns, stock room, and YouTube facade; Core Web Vitals (CLS/LCP), **JSON-LD**, and replacing paid widgets with native patterns.
- Shipped **Expo / React Native** commerce apps to iOS and Android (**EAS** + OTA): single **Apollo** client with typed GraphQL codegen routing **Storefront** vs **Customer Account** APIs; OAuth/PKCE bridged to **Firebase**; Shopify Checkout Sheet; calculator, consultations, product advisor, restock/push.
- Built **Remix** embedded admin app (**Polaris**, App Bridge): pro-account approvals (Customer Account UI + Admin), **Mux** student submissions, push campaigns, restock attribution, **Sanity** promote jobs; Shopify webhooks into Firebase/Expo.
- Delivered **React Router 7** embedded apps (**Prisma/Postgres**): custom bundles via **metaobjects** + theme Bundle Builder/app-proxy discount minting; multi-surface wishlists (theme, Customer Account UI, mobile API) on **Firestore** with an **orders/paid** rewards ledger.
- Own CI/CD to **Fly.io** for embedded apps; expanding unit/integration test coverage across backends and shared workflows.
- Use **Cursor** and **Codex** as a coding partner: plan data shapes/contracts, then API/service layers, then UI; ship incrementally with guardrails and review.
- Partner with design and marketing on UX and campaigns; mentor a junior via pair programming, code reviews, and PRDs/tech specs.

Frontend Developer

April 2023 – August 2024

Galore

London, UK (Remote)

- Built the digital passport platform front-end with **Vite**, **React**, and **TypeScript**: MapLibre maps for provenance and chain of custody, plus service history, care guides, and item storytelling; Tailwind CSS.
- Built a headless Shopify storefront on the Storefront GraphQL API (Vite/React); refactored the marketing site to Nuxt, DaisyUI, and Tailwind.

PERSONAL PROJECTS

Self-Hosted Media Server & Automation Stack | *Ubuntu, Docker, Cloudflare, Bash*

2025 – Present

- Provisioned Ubuntu Server on bare metal (SSH hardening, firewall, updates); Docker Compose stack with persistent volumes and a 3TB auto-mounted media drive via **fstab**.
- Secured remote access with Cloudflare Tunnels (Zero Trust) and Cloudflare Access—no inbound ports; SSL + app-layer auth for admin UIs.
- Automated media pipeline (Lidarr/Sonarr/Radarr + SABnzbd/Usenet) feeding Navidrome and Jellyfin on custom subdomains; bash/systemd for health checks and ops.
- Ops hardening: fixed kernel I/O from a bad optical drive via systemd; ISP/network migration (netplan + tunnel) with no downtime; recovery via journalctl, smartctl, Docker logs.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Liquid, HTML, CSS/SCSS, Bash

Web & mobile: React, React Native, Expo, Remix, React Router, Next.js, Vue, Nuxt, Node, Express, Tailwind CSS

Shopify: Themes, Storefront GraphQL, Customer Account API, embedded apps, Customer Account / checkout UI extensions, metaobjects, App Bridge, Polaris

Data & APIs: GraphQL (Apollo, codegen), Firestore, Postgres, Prisma, MongoDB/Mongoose, REST, MySQL

Platform: Firebase (Auth, Functions, Storage), Mux, Sanity CMS, Fly.io, Docker, Cloudflare, Git, Vite, EAS, Jest, Figma

EDUCATION

San Francisco State University

Bachelor of Arts in English: Creative Writing

San Francisco, CA

September 2010 – July 2012
